

Going above & beyond with technology.

eAgriculture Portal aims to keep farmers abreast with the crop prices and discourage them to carry-out distress sale.

PRODUCT FEATURES

Weather Forecasting

App to inform farmers & community on upcoming weather and overall weather patterns to support crop planning.

Camera & Machine Vision

Leveraging visual data and AI to allow farmers to identify plant illnesses, weed growth, analyze nutrient levels and assess crop harm.

Marketplace

Marketplace portal for farmers to sell crops with secure payment services for transaction settlement.

Analytics

Robust analytics engine for analysis of crop data to support operations and planning.

“The productivity of Africa’s agriculture is low as the continent’s crop yields have lagged behind the rest of the world.” – United Nations

BENEFITS

Improve
Crop Yield

Reduce
Crop Loss

Safe & Secure
Transaction Processing

Empowering Farmers
Cut out middlemen

BENEFITS

Large Enterprise Platforms

Rigorous Budget Management

100+ Implementations

AI / ML Solutions across Different Industries

Effective Globally Distributed Teams
